

This screen lets the user view their personal information such as name, email, phone number if they added one, facility name, and facility info. There is a button in the bottom left corner that allows the user to edit their information.

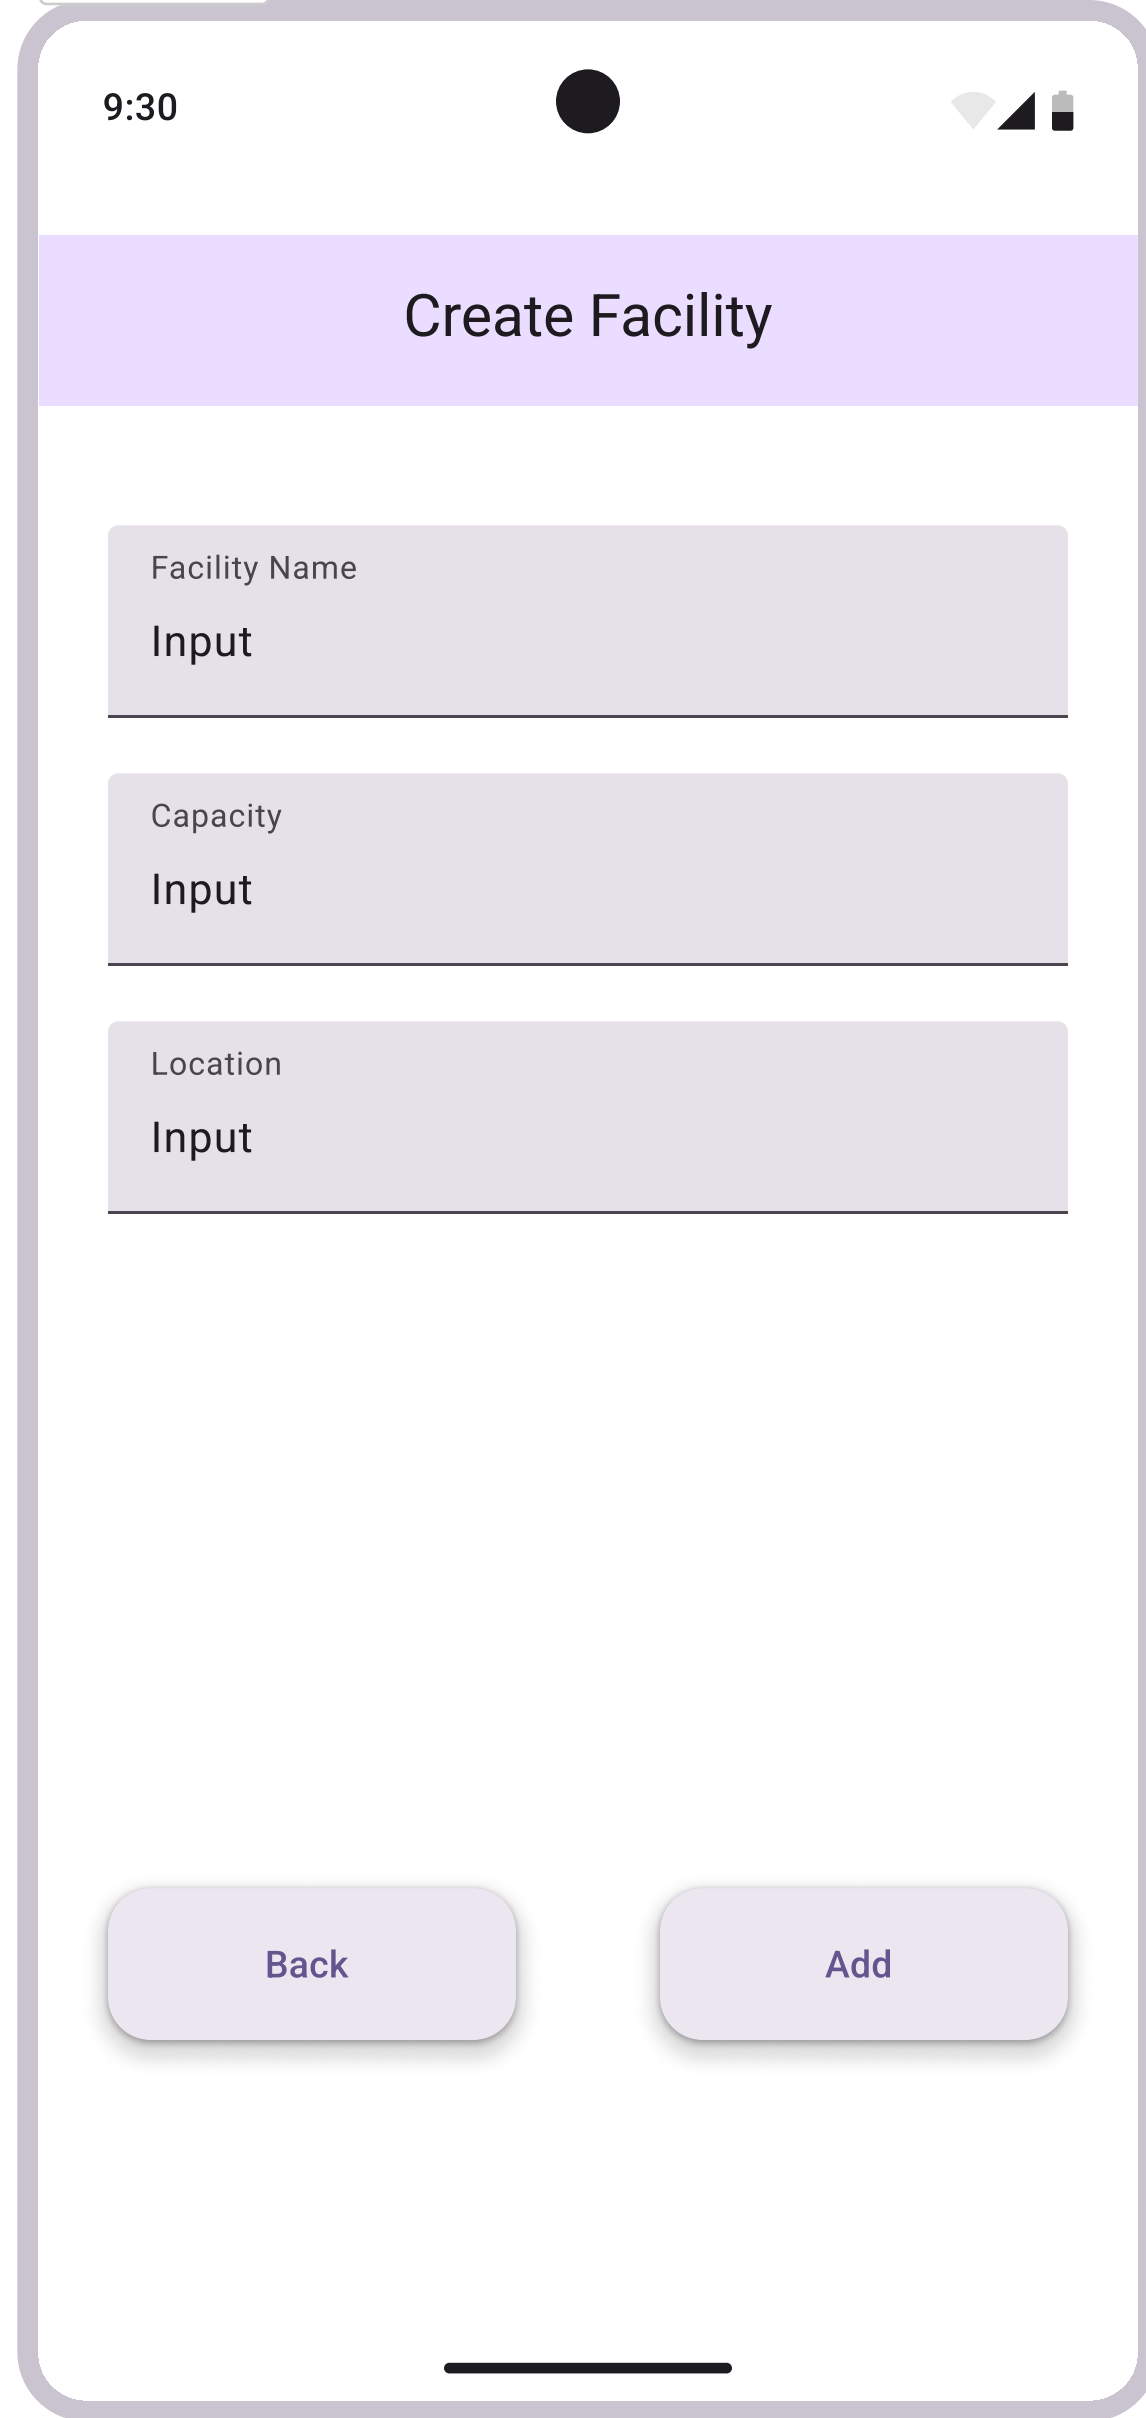

This screen allows the user to make edits to their name, email, and an optional phone number. There is a button in the bottom left corner to save the information. The button on the right allows organizers to add or edit a facility associated only to them

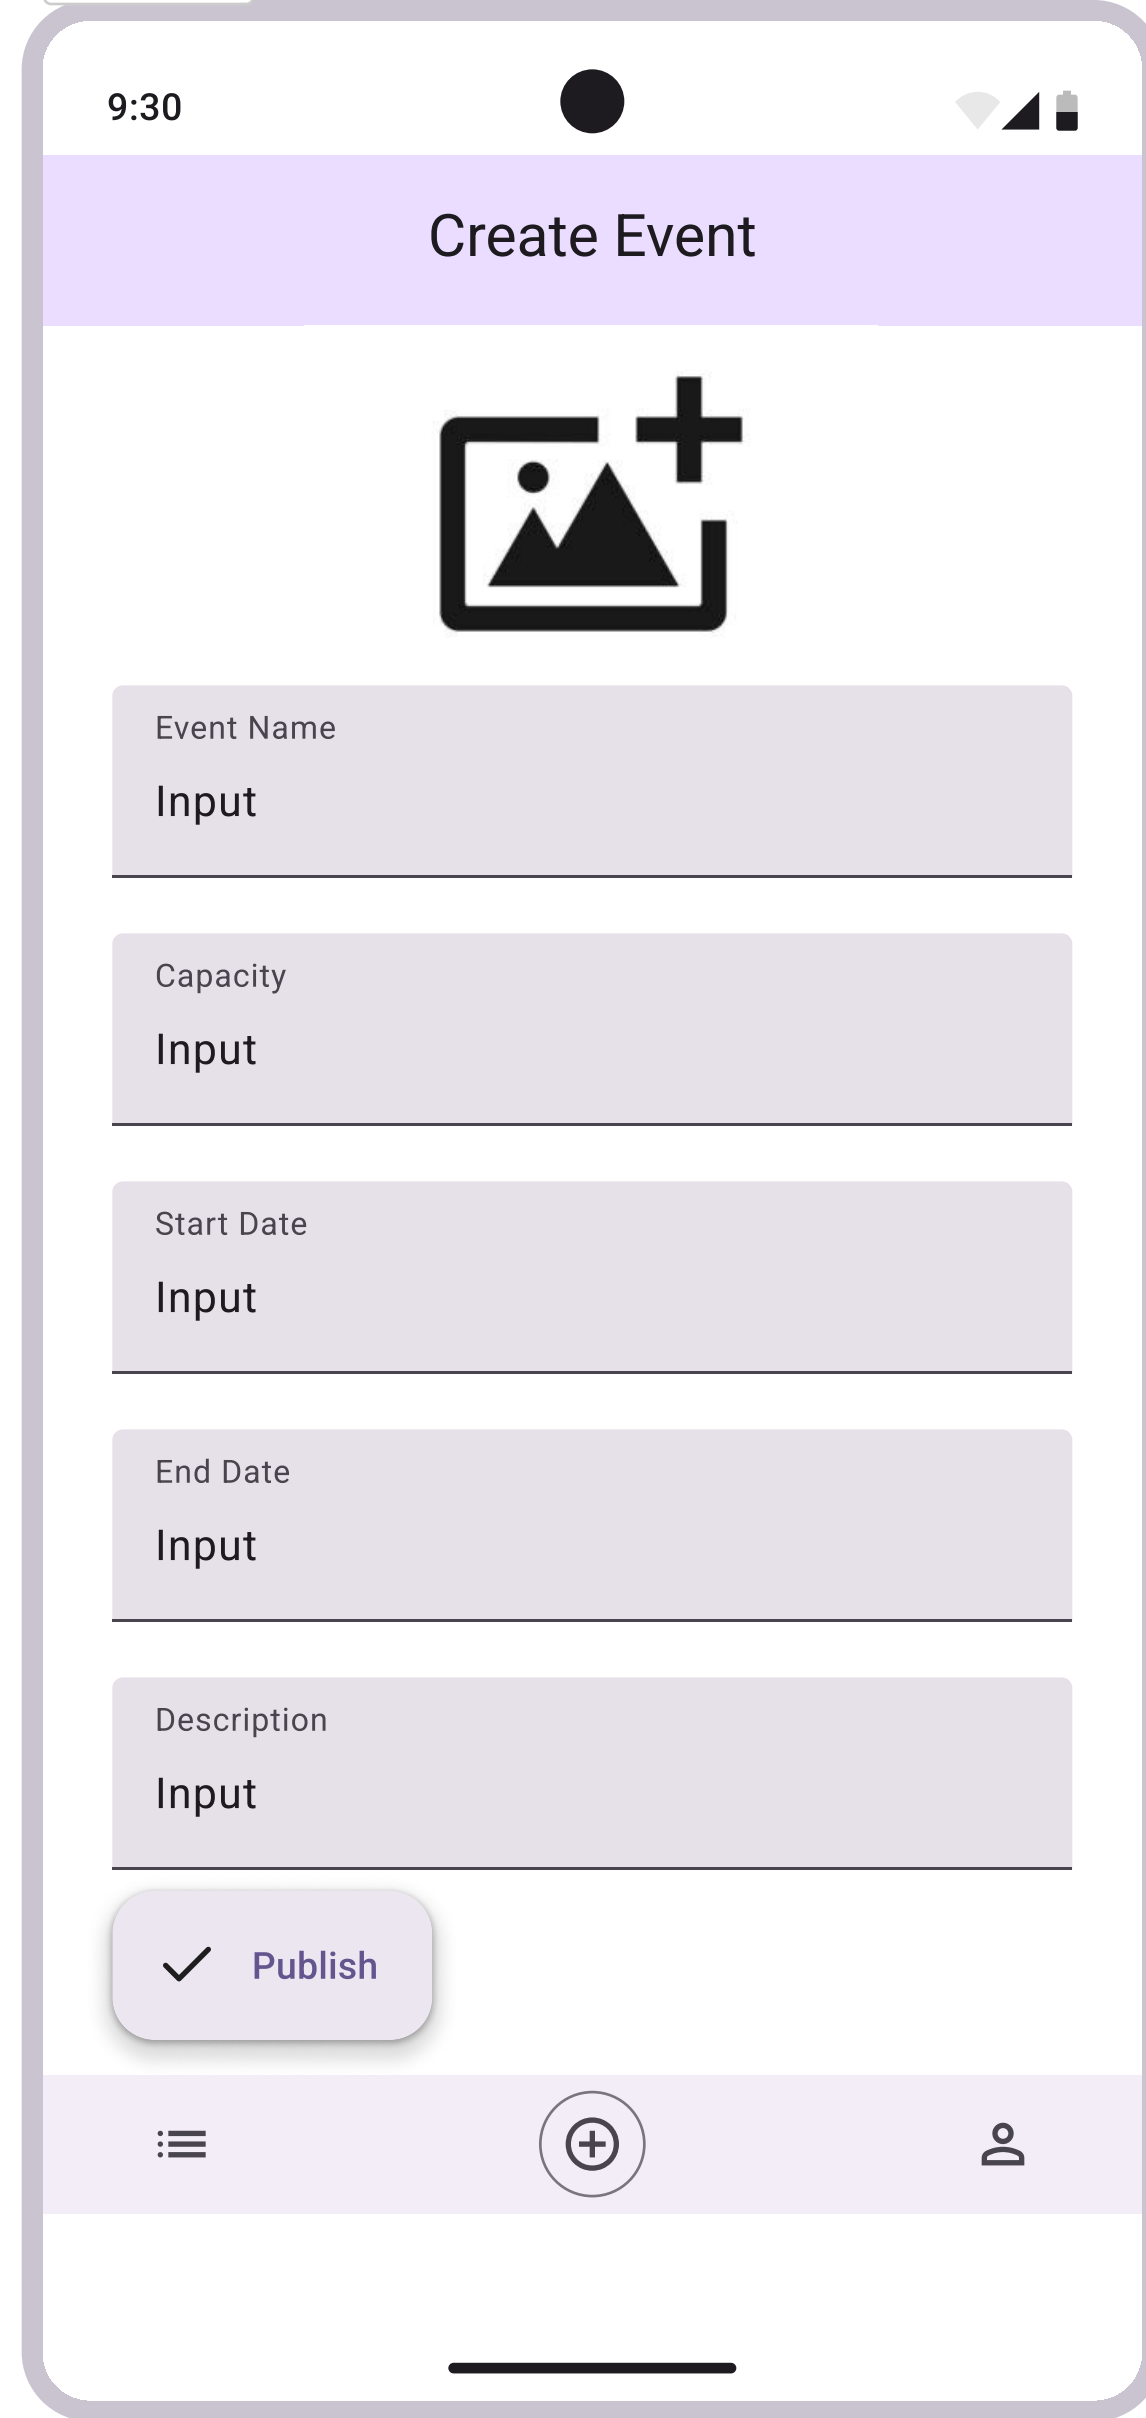

This screen displays all the events that the user is in the lottery for, and thee status. There is a search button at the top of the screen alongside the filter button.

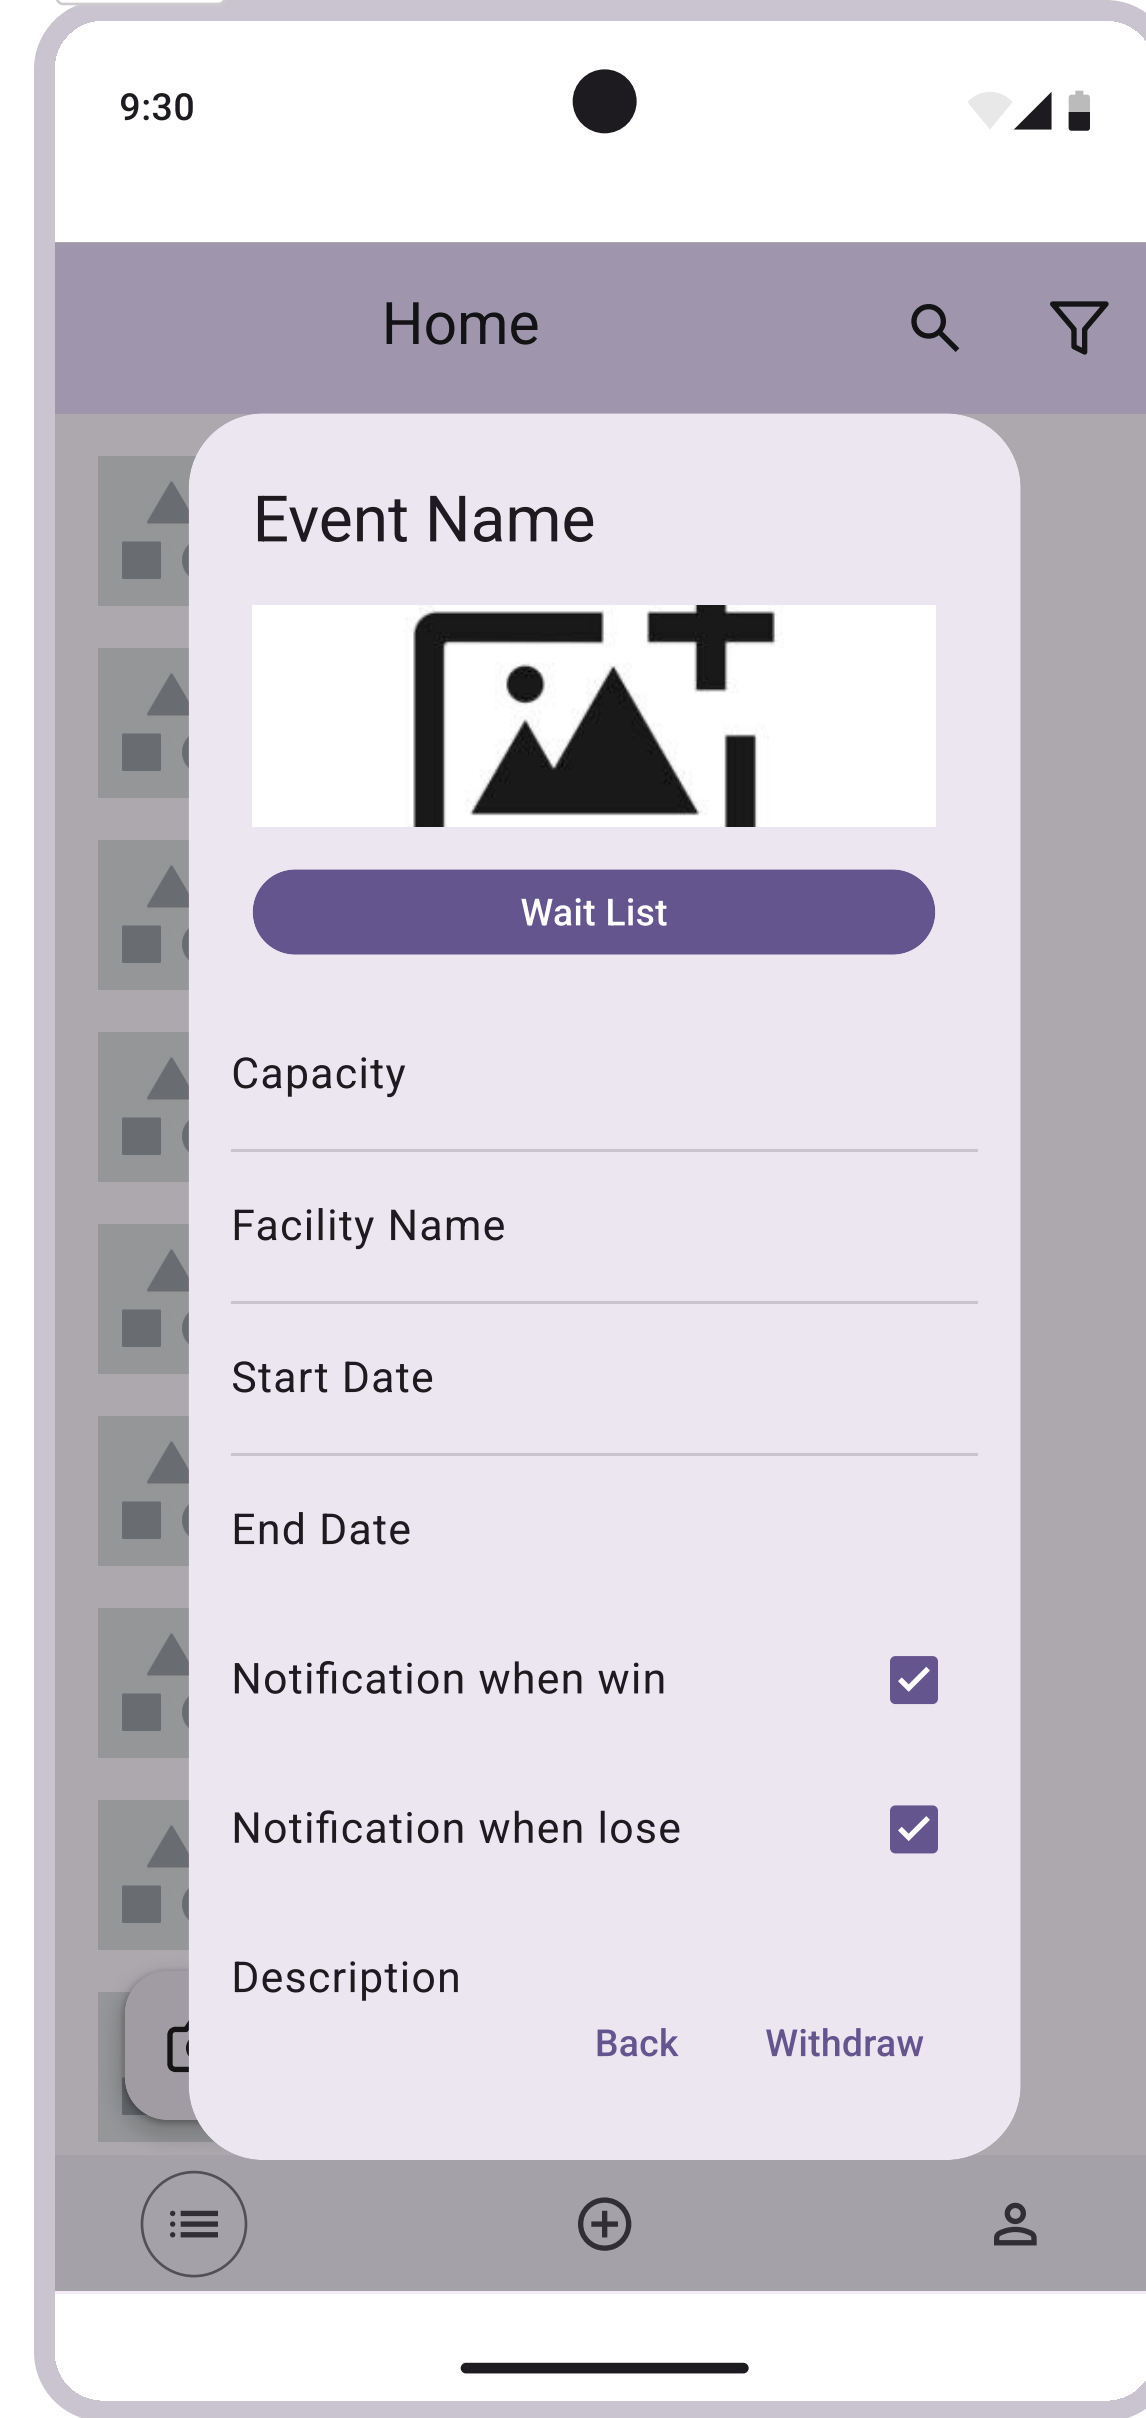

This screen shows the filters that can be applied to the list of events.

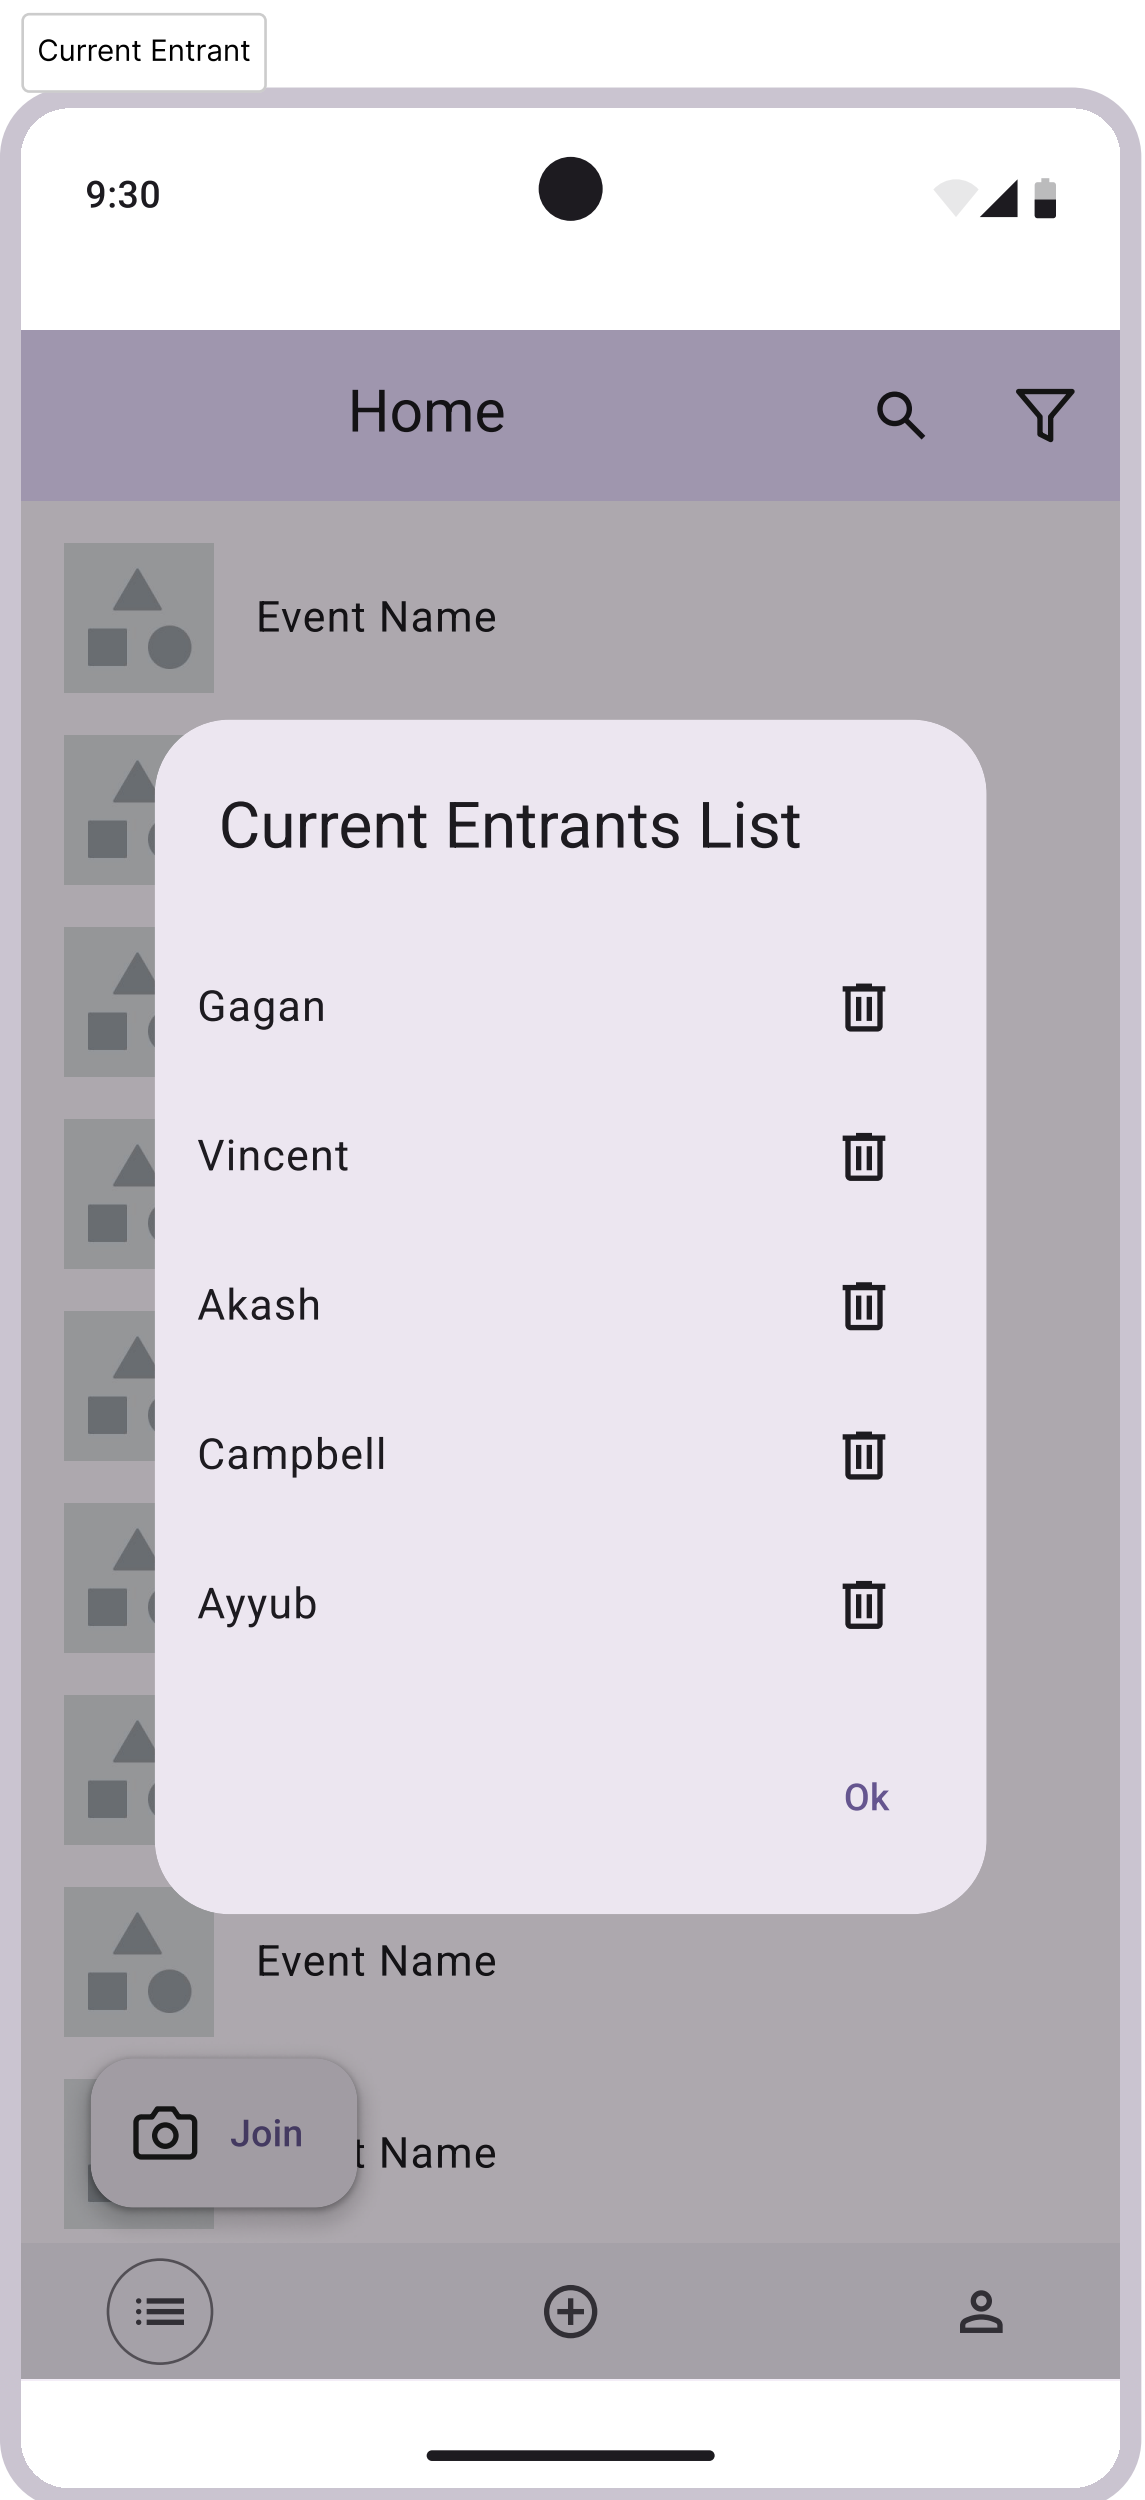

This screen allows organizers to create a facility. They can input the facility name, capacity, and location. There is a button on the right bottom to add an facility and a back button on the left to navigate back to the user profile .

This screen allows organizers to create an event. They can input the event name, event poster, capacity, start date and end date, and description. There is a button in the bottom left corner to publish the event.

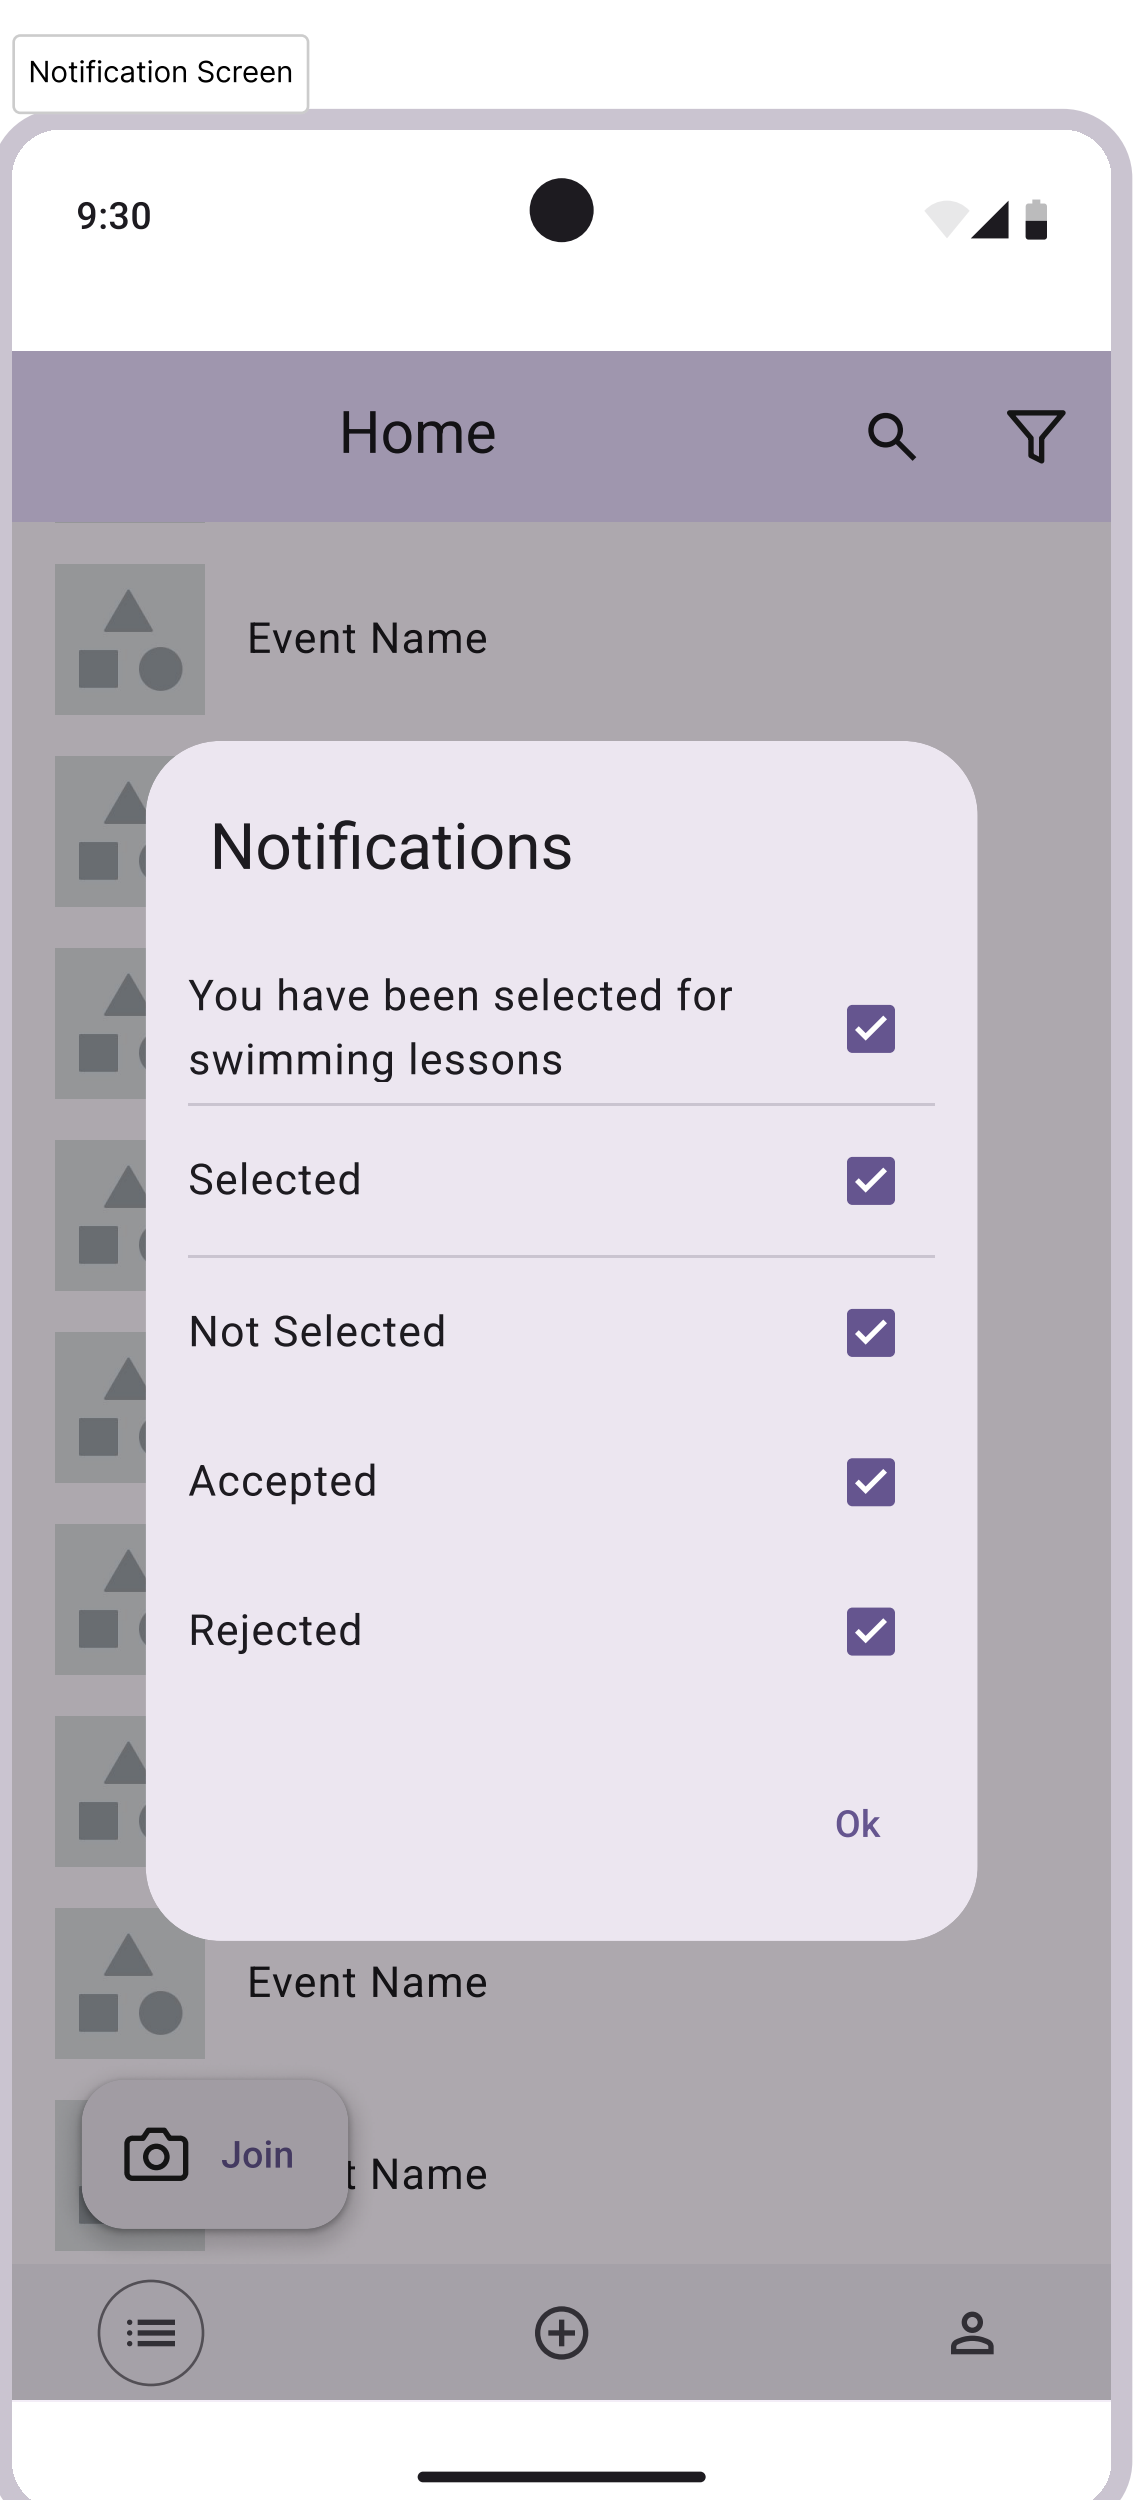

This screen allows the user to see the information about the event the user is in the lottery for. The wait list button displays the wait list of users currently waiting to be added to the event (Only the organizer can see this functionality). The user can turn on or off the notification of the user winning or losing the lottery. The user can leave the event from this screen by clicking the withdraw button.

Organizers should have a screen where they can manage the waiting list:

- View the list of participants.
- Remove or replace entrants.

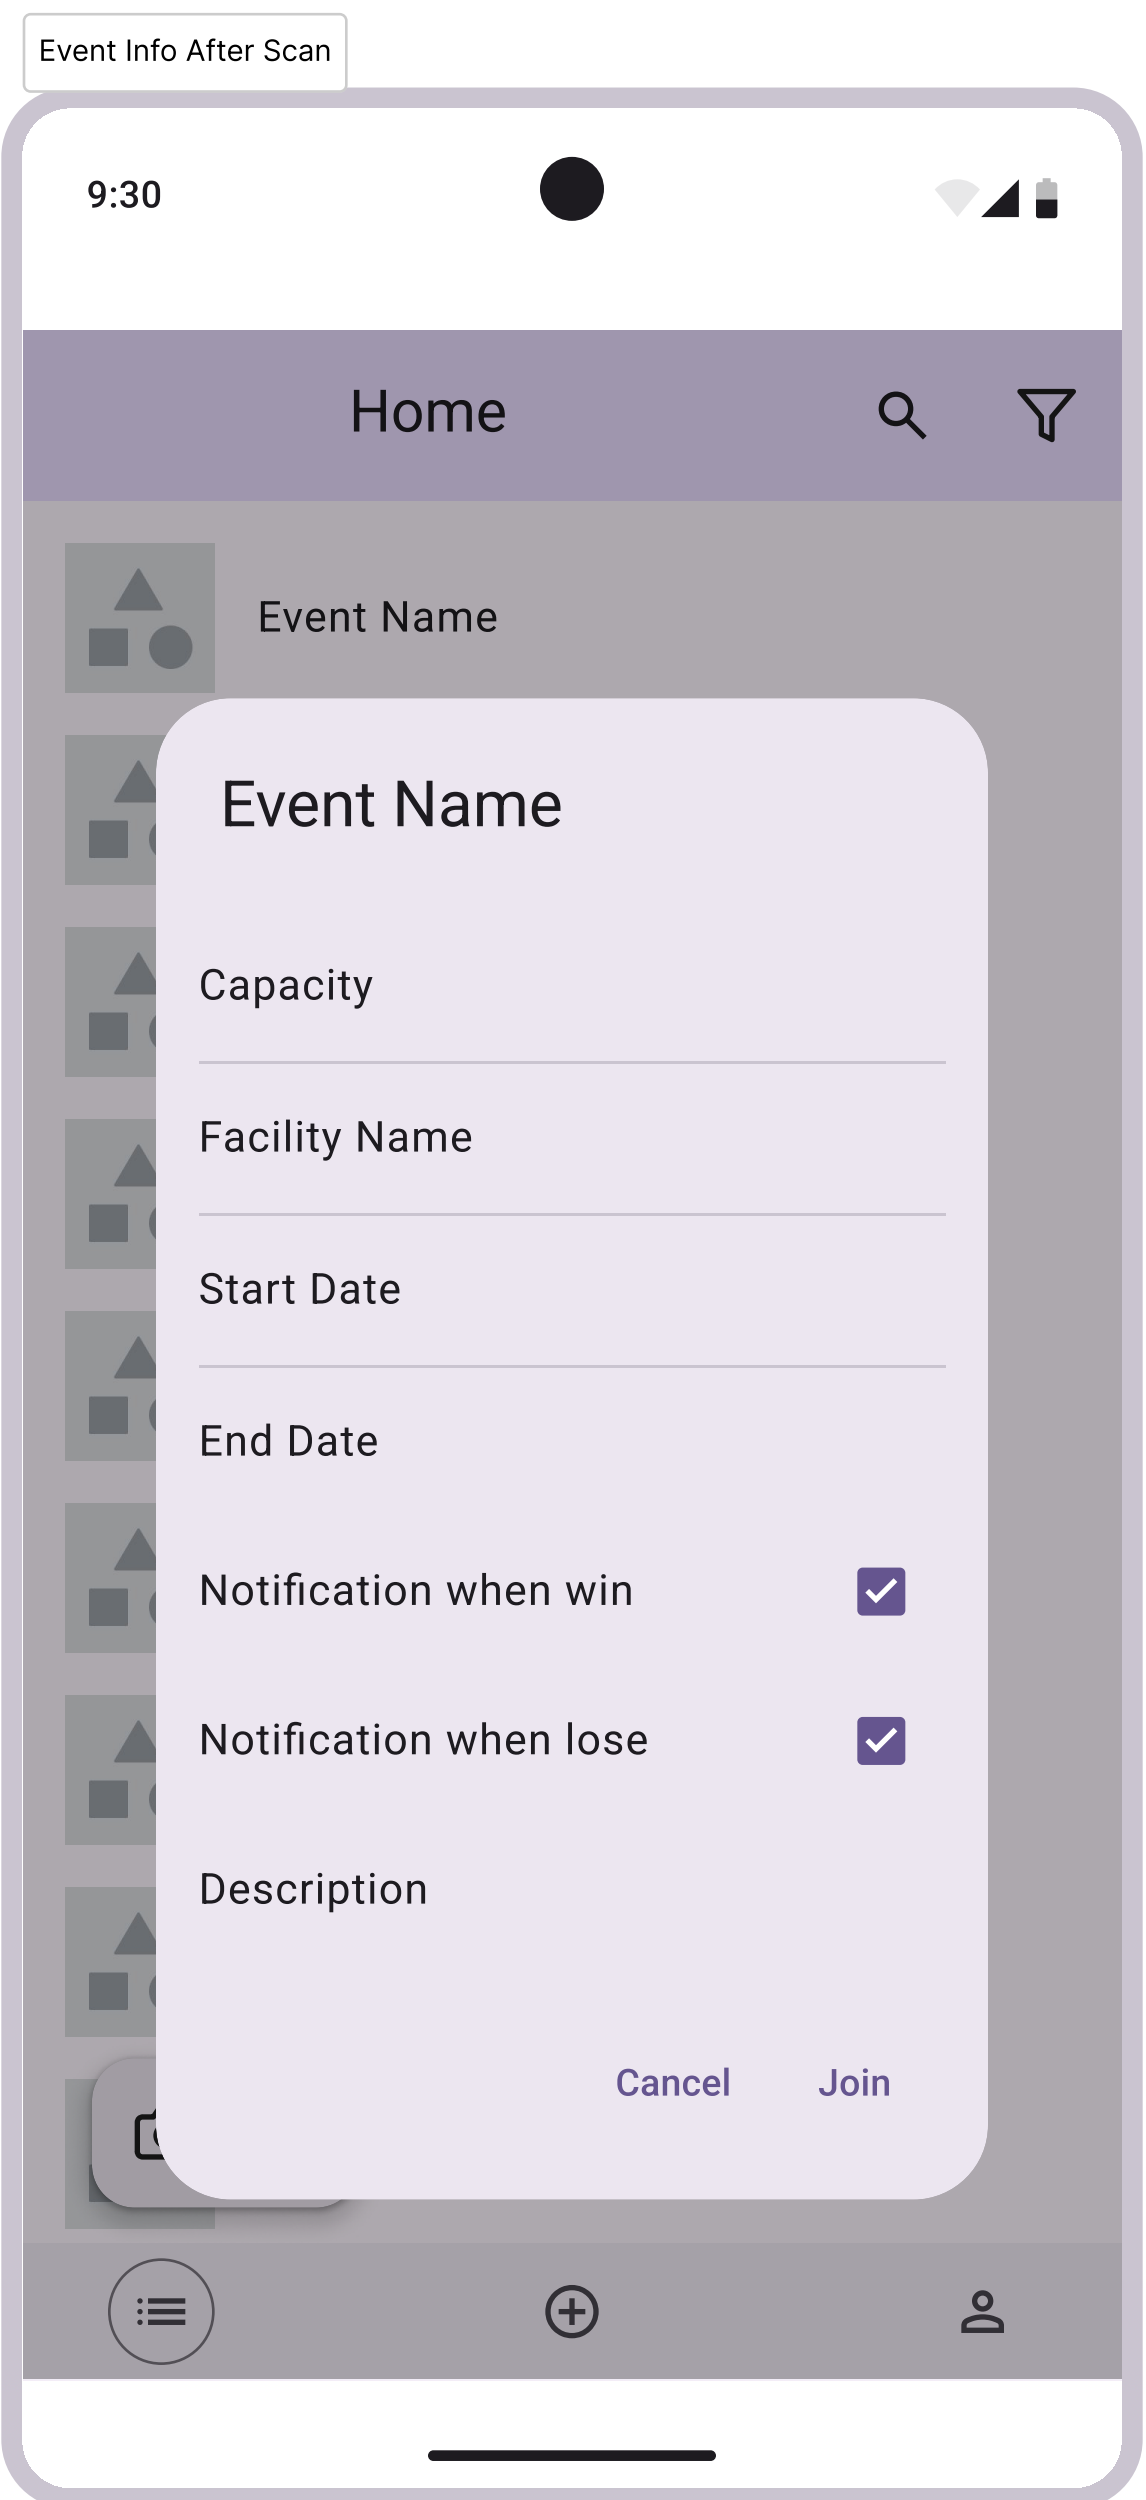

A screen where entrants can manage their notification preferences, such as opting out of certain types of notifications.

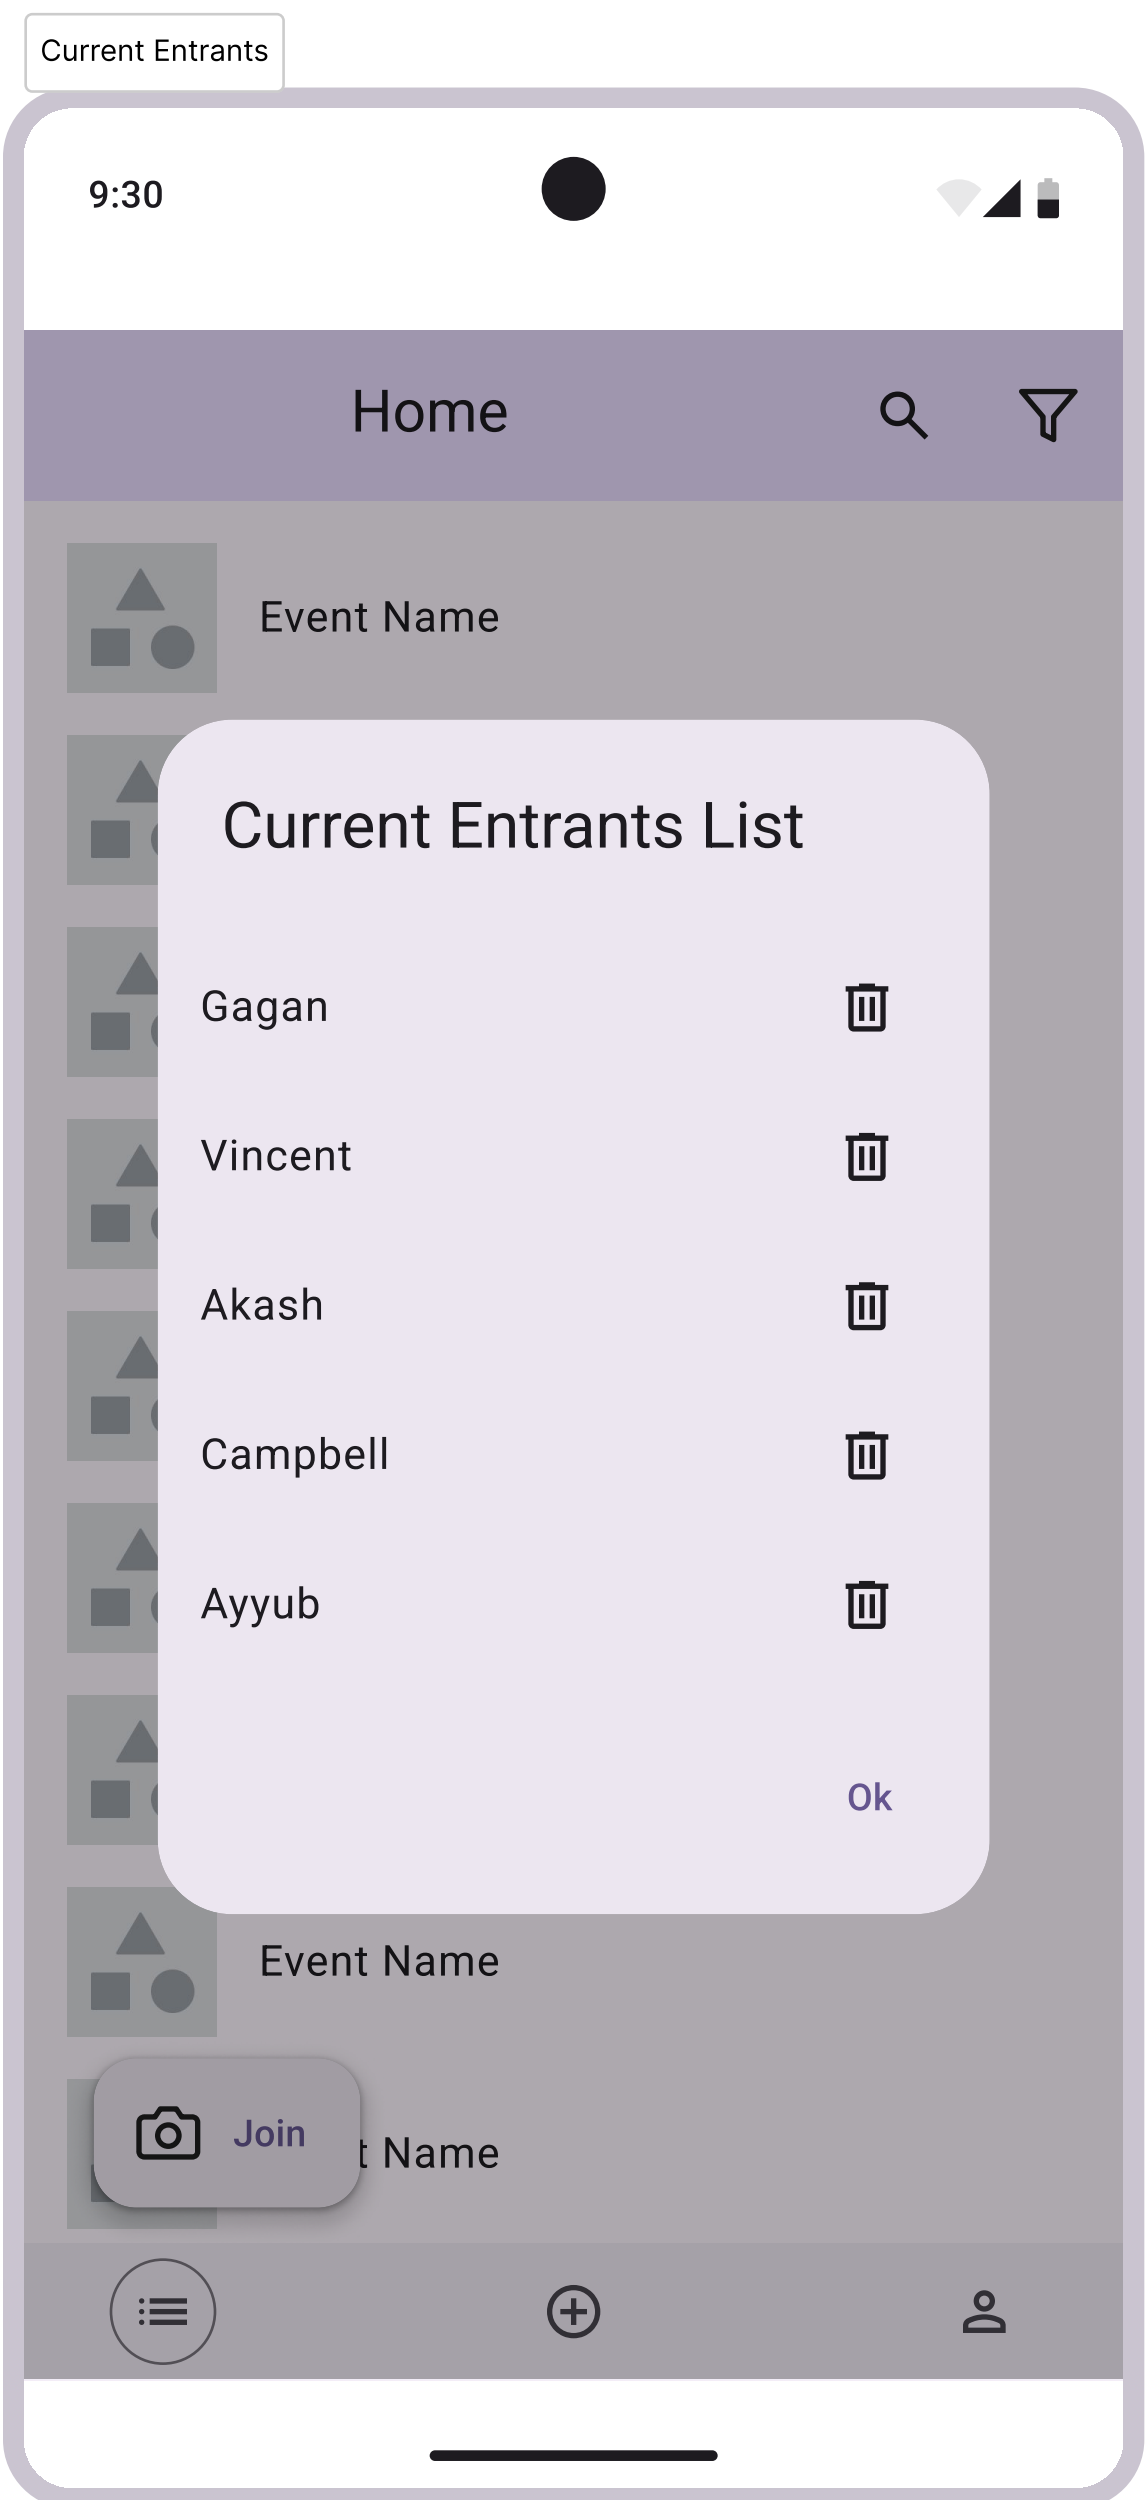

The allows the user to scan the qr-code of an event

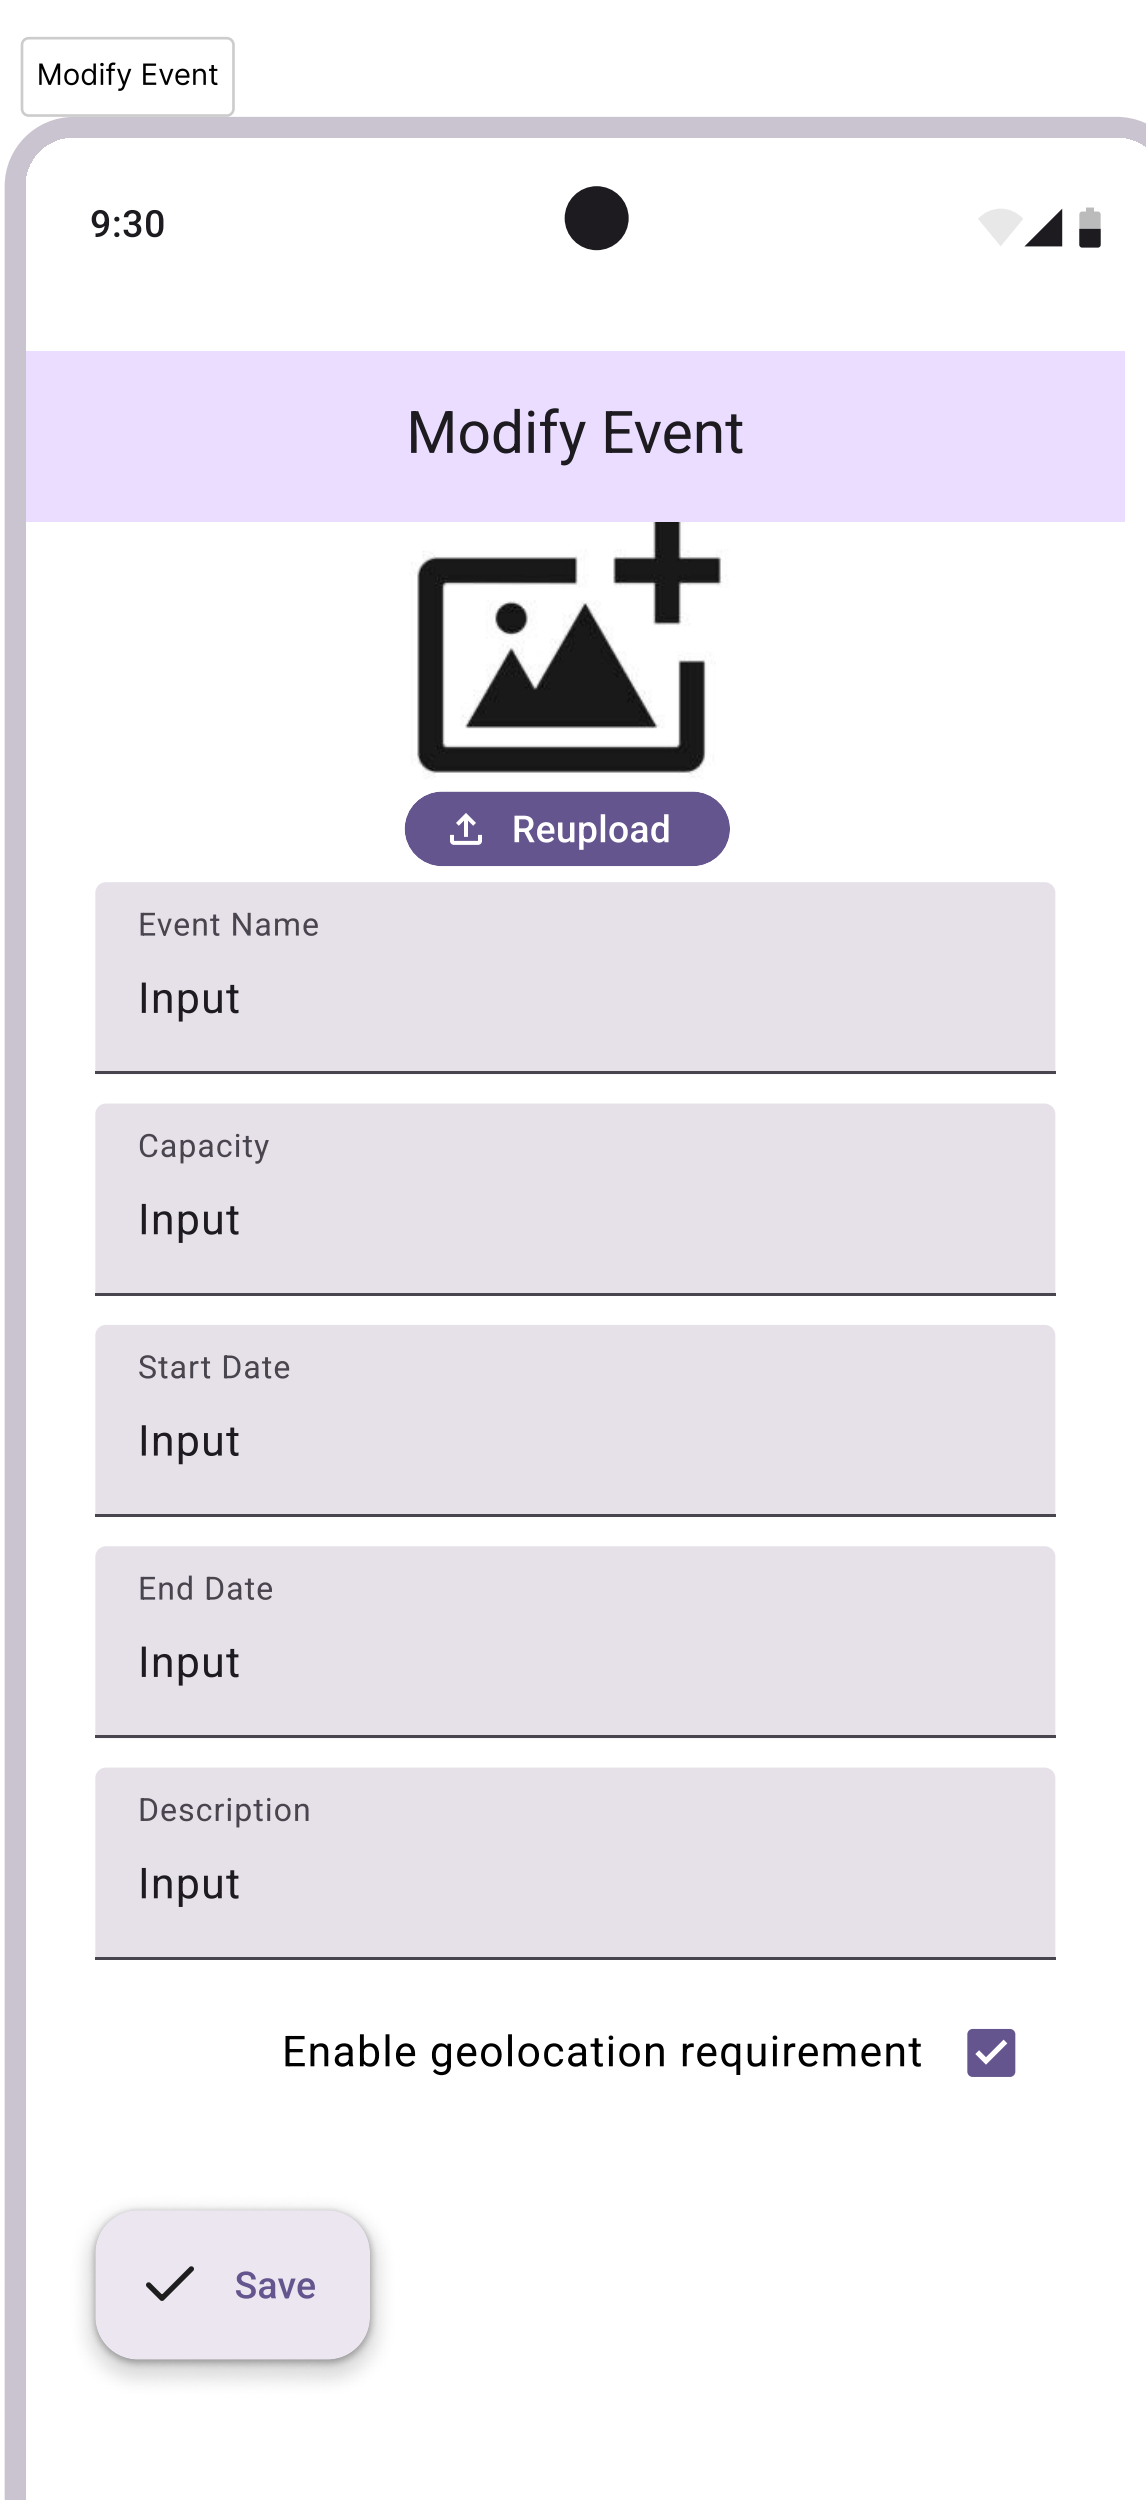

This screen is where the organizer can view the map.

This screen shows all the details about the event after the user scans the QR code and gives them the option to be notified if they win or lose. The user adds themselves in the wait list with the join button.

This screen shows the current entrant list that the organizer sees when they would like to know the attendees. They can also delete entrants from the list.

This screen allows the organizer to modify their event details.
